

“fresh air in - insects out”

FLYSCREENS

MAKE YOUR WORKPLACE A NO FLY ZONE

COMMERCIA

FLYSCREENS INTERNATIONAL offer a comprehensive and stylish range of high quality flyscreens for doors and windows to the commercial market.

Wherever there is a need in your place of work our products suit a wide range of applications making your business a safer, healthier and more comfortable environment to work in.

We can assist you in the specification phase to ensure that your requirements are met in full with selection of the right product and complete the package with a full installation and after sales service.

The Food Safety (General Food Hygiene) Regulations 1995

Extract - Chapter II, 1. D

Windows and other openings must be constructed to prevent the accumulation of dirt. Those which can be opened to the outside environment must where necessary be fitted with insect-proof screens which can be easily removed for cleaning. Where open windows would result in the contamination of foodstuffs, windows must remain closed and fixed during production.

◀ SPA20 Roller Screens

Vertical roller screen suited to commercial use for windows and doors.

- High quality aluminium and PVC-U frame
- Smooth action roller system - mesh is concealed within a cassette and secured by guide rails
- Handles and pull cord for ease of use

Service

SPA200 Door Screens ►

The SPA 200 is a single roller screen with the mesh concealed neatly in a cassette and operated by pulling the screen across just as in a roller blind.

The SPA 200D uses two SPA 200's fixed to each side of the door and operates in the same way - magnetic locks hold the two screens together in the closed position.

- ❑ High quality PVC-U & aluminium frame
- ❑ Easily fitted onto existing doors
- ❑ Smooth double sliding action with magnetic locks for ease of use and zero maintenance
- ❑ Maximum width/height 1600 x 2500 mm
(Shown in aluminium frame for illustrative purposes only)
